

## Clubhouse Expansion Project

---

FALL 2016

We know you have been as excited about our clubhouse plans as we have. We so look forward to celebrating this milestone with you - we are sure it will be more than worth the wait!

The expansion will house a simulator bay, boardroom, golf shop, washroom facilities and office space on three floors. The existing golf shop will become the lounge, complete with a bar, additional food preparation facility and indoor seating area, with easy access to the existing patio.

Construction is scheduled to begin later in October in order to open commensurate with the course in the spring. Almost as exciting is the plan to have the paving of the parking lot completed prior to course opening. Details will be shared at the reception following our End of Season Shamble.

You can look forward to an enhanced menu and amenities at Brunello next season, along with the exemplary service that you have come to expect.
